

Helmsley

The first record to list every man, woman and child living in the township of Helmsley was the Population Census of 1841 but 18 years earlier Tukes and Ayer surveyed the town and produced a numbered map showing every property. They also prepared a detailed list of 274 tenancies from which it is possible to extract the surnames of the tenants living in Helmsley 183 years ago and they are listed on the following pages using the numerical sequence which Tukes and Ayer used to record the tenancies which are shown on the accompanying map and also in alphabetical order to aid quick recognition
